Economic Growth a Legacy of CLP Vision and Foresight

Today’s economic figures released by the Australian Bureau of Statistics are evidence of the Country Liberal Party’s vision, foresight and energy.

However, the figures also show the extent to which the Labor government have dropped the ball when it comes to public spending on infrastructure.

“The Territory is a direct recipient of this planning.

“In direct contrast, Government Final Consumption Expenditure fell 2.2% and Public Gross Fixed Capital Formation which dropped 19.8%.

These figures that prove that Labor have failed to invest in essential public infrastructure that is critical to the economic future of the Territory.

“The Labor government have no vision or energy for the Territory. They are riding on the initiatives that the Country Liberal Party started in government.

“Further and most damningly, Labor have not started and finished one major project in four years of government.”
