Which will come first – cooler weather or refrigerated air conditioning?

Well done to the Principal, staff and students of Braitling Primary School for resolving their problem in a positive way.

The Principals of Braitling and Bradshaw Schools are to be commended on their co-operative effort to relieve the pressure of the over-heated classrooms.

Five senior classes from Braitling are travelling by bus each day to Bradshaw Primary School.

The classroom temperature ranging up to 32\(^{\circ}\) at 8:00 am in the morning does not look like abating with the weather forecast of 40\(^{\circ}\) temperatures.

This positive solution of moving 120 students allows the remaining classes to share the refrigerated air conditioned classrooms at Braitling Primary school.

The co-operation of both schools including use of buses, has ensured this exercise has gone smoothly.

Rather than let staff and students swelter, the Principal, Sue Crowe, has taken some positive action to relieve the unacceptable conditions.

The question to be asked is -
Which will come first – cooler weather or new air-conditioning?
