Gerry Wood, the Independent Member for Nelson, says the Berrimah Research Farm should be used as a Prison Farm attached to the Berrimah Prison.

The CAYA report that the Government established said that a prison farm should be established.

With the Government intending to close the Berrimah Research Farm down, there is a great opportunity for at least some of the farm to be used as a prison farm. The farm has infrastructure such as sheds, farm equipment, bores, good soil, established pastures and a forestry and mango plantation. Ideal for a prison farm.

This is just another reason why the Berrimah Prison should stay at Berrimah and not be shifted out to some unknown location.
