WHERE HAVE ALL THE FLOWERS GONE?

Gerry Wood, the Independent Member for Nelson, says that someone appears to have stolen hundreds of plants from the Coolalinga landscape project.

Gerry says he was checking out the site on the long weekend only to find most of the plants have been pinched.

He says he first thought the plants may have been removed by the Department but on checking he found this was not the case.

Gerry says that although some of these plants were to be replaced with native species, the taking of these plants had nothing to do with that programme.

Anyone who knows of someone who now has an instant garden similar to the Coolalinga plantings should report it to the Department of Infrastructure or the Police.
