

# Local Services **DIRECTORY**

## Profile

### New coating to protect car parts

IF you want the ultimate protection for your car parts then get the best at Ceramic Coating.

There is no need to travel down south for the service; it is located locally in Palmerston.

Ceramic Coating provides a thermal barrier to your car parts so that they can withstand greater heat and last longer.

The protective coating can prevent corrosion and rust and resist the elements.

Dale Hood is a local in the know with a worldwide certification using the latest in modern technology from NIC Industries.

Ceramic Coating conducts ongoing

research and development into this technology and with it comes an in-house quality assurance. Cerakote is a unique ceramic structure that out-performs any competitive coating and improves performance in both the laboratory and real world settings.

It comes in a variety of colours from screaming yellow to jet black to give parts a great look.

This cost-effective coating can be done quickly on-site by Dale, who has been in the Territory for more than 18 years.

Dale Hood with wife Cheryl and son Connor are locals ready to help you at Ceramic Coating
