 Boundary Commission needed now!

Gerry Wood, the Independent Member for Nelson, says the Government must set up an independent Boundary Commission similar to the one that was set up in Queensland when that state was reviewing its local government boundaries.

Gerry said the Local Government Association of the NT should also support such a move.

Gerry says that when you have the Minister for Local Government and the local member pushing for change in the Vic/Daly Shire based on CLP promises rather than a proper and independent assessment, one should be concerned, very concerned.

He says that the Government should announce an independent Boundary Commission immediately and take the party politics out of the process so that everyone from residents to existing councils and their staff can have the opportunity to have their say.
