The Northern Territory Government and the City of Darwin will work together to enhance the attraction, productivity, resilience and liveability of Darwin.
AN ATTRACTIVE DARWIN
A physically attractive city, showcasing the green tropical environment. A city that attracts businesses, investment and development opportunities.

A PRODUCTIVE DARWIN
Harnessing the productivity of the Darwin community by better managing the use of labour, creativity and knowledge, land and infrastructure. A vibrant and active centre where people live, work and play. Making the centre the focus of employment in order to invigorate business and tourism. Providing residential choices for living in the city to support activity. Ensuring an energetic and appealing social, cultural and economic capital city.

A RESILIENT DARWIN
Advancing the protection of Northern Australia’s natural and built environment through better resource and risk management. It is our role to conserve and protect the Darwin environment and to maintain a resilient and resource efficient city for current and future generations of Territorians.

A LIVEABLE DARWIN
Enhancing the liveability of our city through better urban design, planning and access to a range of recreation, arts and community facilities. We will be inclusive. And together we will celebrate Darwin’s cultural diversity and work to promote and support activities that celebrate our Indigenous culture, local history and recreation options. We will identify opportunities to extend and enhance existing public spaces and we will focus on aesthetic improvement, functionality, accessibility and amenity.

GOVERNANCE
A collaborative governance structure, ensuring collaborative processes, to achieve Northern Australia Capital City outcomes.

Specifically, the Northern Australia Capital City Committee will deliver the following to achieve our stated outcomes:
- The Darwin City Centre Master Plan
- Economic development opportunities
- An engaging and diverse tropical lifestyle
- Measures to address anti-social behaviour

The Northern Australia Capital City Committee will strive to achieve the following outcomes:
- A visually attractive, liveable and productive built and natural tropical environment;
- Integrated land use and transport planning, leading to effective social, cultural economic and environmental outcomes that align with the Darwin Regional Land Use Plan;
- Vibrant urban places and public open spaces;
- A collaborative governance model; and
- A safer Darwin.

Katrina Fong Lim, The Right Worshipful Lord Mayor of Darwin

The Honourable Adam Giles MLA Chief Minister
