MEDIA RELEASE

Michael Gunner
TERRITORY LABOR LEADER

15 April 2016

CHANDLER ADMISSION IS BAD NEWS FOR BUSINESS

The fact the CLP Government has only spent less than half of its infrastructure cash two thirds of the way through the financial calendar is bad news for business and hurts Territorians looking for work.

“This CLP Government has lost the economic plot. To have only spent $500 million when they should have actually spent $800 million at this point in time is bad for business - meanwhile they claim to be fixing their own economic black hole by spending a $100 million in stimulus,” Mr Gunner said.

“CLP maths is bad for business, as is their infighting and constant scandals.

The biggest risk to the economy of the Territory is four more years of the CLP Government.

“The economy is on its knees and businesses are looking for work. They want to keep their employees and their subbies in jobs.

“To have only spent $500 million two thirds of the way through the year is a disgrace and is not something the CLP should be proud of.

“The Government needs to be getting the work out of the door quickly and the money needs to be flowing through the community and down into subbies, small business and workers.”
