Want Uber? Vote Labor!

Territory Labor’s 5 Point Plan to Bring Uber to the Territory

1. Territory Labor will listen and act

All Territorians will be consulted and have the ability to make submissions as part of designing a simple and effective set of rules to allow Uber to operate in the Territory.

2. Territory Labor will ensure all stakeholders have a seat at the table

Labor will create a steering committee with representatives from the Commercial Passenger Vehicle Industry, the Taxi Council, consumers, business groups, unions and economic experts to advise Government on legislation to allow ride sharing in the Territory.

3. A fair go for passengers, workers and new and existing operators

Labor will ensure the safety of passengers, fair working conditions for employees and a fair go for new and existing operators.

4. Smart, open and fair regulation

Territory Labor will be guided by the sharing economy principles outlined by Federal Labor. These include:

• Primary property is yours to share
• New services must support good wages and working conditions
• Everyone must pay their fair share of tax
• Proper protection for public safety
• Access for all
• Playing by the rules

5. Action in 2017

A Labor Government will introduce legislation to parliament in 2017 to allow ride sharing services to operate in the Northern Territory.
