A key road for Ti Tree’s table grape industry will be upgraded and sealed by the Territory Government, Primary Industry Minister Kon Vatskalis announced today.

“Woodforde Road in the Ti Tree Farms region is used by growers to cart fruit and dispatch it to interstate markets, and can be significantly damaged by rain during harvest periods as heavy vehicles move along the dirt road,” Mr Vatskalis said.

“The Northern Territory Table Grape Growers Association had lobbied me as Primary Industry Minister on behalf of their members to let Government know how important it is to upgrade Woodforde Road, and Government has listened and is acting.”

Mr Vatskalis said the Department of Infrastructure, Planning and Environment had advised the project was expected to be underway within months.
