CLP opposes changes to open speed limit

27 September 2004

The CLP would advise Deputy Prime Minister John Anderson to resist any push to have the Territory's open speed limit abolished, CLP Leader Terry Mills said today.

"I know Mr Anderson is doing the polite thing by agreeing to talk to road safety officials lobbying to have the Territory's open speed limit abolished, but the CLP would advise the Deputy Prime Minister to resist their urgings," Mr Mills said.

"There has been enough interference in our speed limits already by the Martin Government without any further changes being made.

"Rather than changing our speed limits the CLP will continue to lobby Mr Anderson for extra funding for those Territory roads – particularly our beef roads- that are a safety risk because of their state of disrepair."
