LIGHT UP THE DARK SPOTS

When will we see an increase in lighting in the dark spots around town?

Requests to the Town Council to brighten up the carpark at Hearne Place, has apparently met with the comment that it is adequate.

But no, it is not.

The laneway between the Post Office and the Commonwealth Bank has now become a drinking area at night. Will the Town Council do something about that lane other than clean up the mess the morning after.

The Northern Territory Manager of Australia Post has agreed to improve the lighting in the alcoves near the private boxes and the walkway, and I thank him for his quick agreement, but how long will it take the Town Council to do something about the car parks.

With the increased valuation of properties now released, no doubt our rates will rise.

I urge the Town Council to start spending Rate Payers money on improving the town image and making it a safer place.

Lighting was a recommendation of the Community Forum. Just do it!
