The Northern Territory has significant undeveloped onshore oil and gas resources that will strengthen our economy. Delivery of world's best regulations

The Northern Territory has a robust system to regulate the oil and gas industry. The Territory Government is committed to protecting our environment. The Government is reviewing and strengthening its regulations to make sure laws are up to date with the latest developments in the oil and gas industry. The community and industry will both benefit from the opportunity to comment on any proposed changes to the regulations during a wide consultation process. The Department of Mines and Energy regulates the oil and gas industry.

The department’s experts work with the NT Environment Protection Authority on any oil and gas activity that could potentially have a significant impact on the natural environment.
