Price Hikes Pain

Terry Mills and the CLP are out of touch and have no idea how much hurt they are causing to Territory families and business with their unjustified PowerWater price hikes.

At a child care centre today Opposition Leader, Delia Lawrie said Terry Mills and the CLP continue to cause untold damage to families and businesses.

“Child care centers provide an essential service to families, and will need to pass on additional power and water costs to their customers,” Ms Lawrie said.

“Many families struggle cope with the cost of child care. Finding an additional $2,000 for their PowerWater bill along with increased child care costs will cripple Territory families.

“The CLP promised they’d reduce the cost of living if elected, but have broken their promise within the first 100 days, and Territorians are paying the price.

“Treasurer, Robyn Lambley, who by her own admission is “not good at math”, is implementing one big hit upfront hoping people forget about the pain she has inflicted by the 2016 election.

“Territorians won’t forget, families won’t forget, and business won’t forget.

“The CLP Government is out of touch, and Territorians continue to pay the price.
